CERTIFICATE OF NURSERY INSPECTION

This is to certify that in accordance with the Nursery Inspection Act enacted by the Forty-seventh General Assembly and approved March 27, 1913, the nursery stock of the H. W. Jenkins Nursery, grown at Boonville, Cooper County, Missouri, was inspected on August 9, 1919, by a duly authorized Inspector and found apparently free from dangerously injurious insects or plant diseases. Valid until July 1, 1920 unless sooner revoked.

S. R. MCLANE,
Deputy Inspector.

L. HASEMAN,
Entomologist and Chief Inspector.

TERMS OF SALE

I assume all costs and risks till plants are delivered to purchaser, guaranteeing them to be in good planting condition when received or money refunded on return or plants. But am not responsible for **failures** over which I have no control. Plain printed directions how to handle and care for your plants will be sent with each order. This List is my **only salesman**. When you order from it, you deal direct with the grower and owner, which is a safe sensible way to buy your plants. **Cash** or good references must accompany each order before shipment.

At Your Service,

H. W. JENKINS.

Nursery Stock never was as Scarce in the United States, or as High in Price as it is today.

STRAWBERRIES

The list of varieties not a long one but are the ones that will produce the **berries**. Varieties marked (P) are pistillate, or female plants. Those marked (S) are staminate, or male plants. They should be planted in right proportions to insure fertilization of the blooms. At least one-third of each bed should be set to staminate varieties.

Prices: **Spring varieties all kinds, Dozen 40c; 100, \$2.00.**

Fall (or Everbearing), Dozen, 50c; 100, \$2.50.

Special price quoted on large orders on application.

DESCRIPTION OF SPRING VARIETIES

Bubach, (P)—Plant stocky, vigorous and productive of very large berries; inclined to be a little rough in shape but well colored. Too soft to ship far—a good home berry.

Warfield, (P)—Plant medium sized but a thrifty grower; makes lots of new plants. Is a very productive medium sized, smooth, conical dark red berry of fine flavor.

Haverland, (P)—Plant stocky and healthy but requires good soil and good care, is wonderfully productive. Sets so many berries the fruit stems cannot hold them up off the ground. The berries ripen early and are large and smooth; are long in shape and well colored. A good all around berry but will not stand abuse.

Senator Dunlap, (S)—A strong vigorous growing plant. Will stand more drouth and hard knocks than any other variety. Is a strong staminate and a good pollener; very productive of large, well shaped, high colored berries—a very popular variety.

Gandy, (S)—Plant is healthy and vigorous; makes strong fruit stems that hold the berries up off the ground. Only moderately productive of large, well colored, firm berries of most excellent flavor. Is very late in ripening.

FALL (OR EVERBEARING VARIETIES)

These ripen a crop in the spring same time as the spring varieties. Then they remain dormant for a few weeks when they begin to bear another crop, and, if weather conditions are favorable, will continue till cold weather. Picked our last berries the past fall on November 8. Plants set in April will make new plants that will bear in September and October.

- ✓ **Superb, (S)**—Plants large, stocky and vigorous; moderately productive of smooth, large berries.
- ✓ **Progressive, (S)**—Plants vigorous, strong grower and very productive. Ripens its first crop very early. Berries are large, well colored and of most excellent flavor. The best all around variety.

RASPBERRIES

- ✓ **Cumberland**—Called the "Business Black Cap" on account of its productive qualities of large berries. **Tip Plants, 60c a dozen, \$4.00 for 100.**
- ✓ **St. Regis**—A red variety which is hardy and productive of medium sized berries. **60c a dozen; \$4.00 for 100.**

BLACKBERRIES ROOT CUTTING PLANTS

- ✓ **Snyder**—Canes very hardy; don't winter kill; not affected by rust. Is productive of medium sized berries. **60c a dozen, \$4.00 for 100.**
- ✓ **Mersereau**—A strong, vigorous growing variety. Berries are large and juicy. Crop ripens after the Snyder. **60c a dozen, \$4.00 for 100.**

GOOSEBERRIES

- ✓ **Downing**—A large fine berry. **Each 30c.**
- ✓ **Houghton**—Berries medium sized. Smaller than Downing but more productive—never fail to produce a crop. **Each 30c.**

CURRANTS

(The best of all berries for Jelly)

- ✓ **Wilder**—A very large, red, productive variety. **Each 30c.**

GARDEN ROOTS

A bed of rhubarb and asparagus will supply your table in the early spring when food stuff is scarce and high.

Linneus—Rhubarb, 1 year roots. **Each, 15c; \$1.50 per Dozen.**

Conover's Colossal—Asparagus. **Each 3c; \$2.00 per 100.**

DAHLIAS

Wm. Agnew—Deep red and extra fine. **Each 25c.**

PEONIES

Festiva Maxima—The finest white variety. Flowers are very large and beautiful. Each 50c.

CANNAS

Robusta—Bronze leaf; a tall grower, 6 ft. Flowers small. Each 10c.

Louisiana—Green leaf; tall, 4 ft. Flowers are large and bright red. Each 20c.

Richard Wallace—Green leaves, yellow flowers. Each 20c.

King Humbert—Bronze leaves; flowers large orange scarlet. Each, 20c.

GRAPE VINES

FREDONIA GROWN

Are one year plants. Grape vines are very scarce this spring; no surplus any place, can only furnish Concord.

Concord—The best old standard black grape grown. Each 30c.

ORNAMENTAL HEDGE

Thunberg's (or Japanese Barberry)—Hardest and finest of all hedges, 12 to 18 inch. Each 20c; \$10.00 per 100.

TESTIMONIALS.

Nevada, Mo., Jan. 1, 1920.

H. W. Jenkins

Dear Sir—The 3,000 berry plants received from you last spring were the finest plants I ever bought and I have been buying plants for 25 years. They came in fine shape and have given me the best of satisfaction and I have a fine prospect for berries this coming spring.
(Signed) B. J. MOSIER.

Purcell, Mo., Jan. 5, 1920.

Friend Jenkins:

Those strawberry plants (900) I got from you last spring sure were fine. Every plant lived.

Best luck I ever had with plants.

Yours truly,

(Signed) G. B. HUBBARD.

Meadville, Mo., Jan. 17, 1920

H. W. Jenkins.

Dear Sir—The plants received from you last spring came through in fine shape. Were as nice, thrifty a bunch of plants as any one could ask for. You may expect another order from me this spring.

Yours, C. R. HINTON.

Mr. Jenkins:

Plants received in fine condition Saturday. Thank you for such nice plants and prompt shipment.

Yours truly,

(Signed) MRS. LOUISE KOENIG.
